

D-VAR VVO®

Distribution Class STATCOM

Solve power quality problems quickly and cost-effectively

Applications

- Increase hosting capacity for Solar PV and EV fast-charging
- Quickly recover unserved energy due to power quality problems
- Increase feeder capacity and efficiency “without wires”

above ground feeder installation

Robust power electronic solution

- Precise & continuous control of volt/VAR on medium voltage circuits
- Displace non-effective or problematic mechanical equipment
- No cycle limitations
- No routine maintenance
